Dear Planning Policy Team,

Please find attached my response to the Luton Local Plan Review Scoping Consultation.

I recognise that this stage of the process is intended to identify the issues that should be examined, the evidence that should be gathered and the priorities that should inform preparation of the new Local Plan.

My submission focuses on what I believe are the key areas where further evidence gathering and assessment would assist the next stages of plan preparation. In particular, I have sought to highlight the importance of understanding Luton's strengths, weaknesses, opportunities and risks, together with the need to consider both immediate and longer-term challenges and opportunities.

I have also suggested a number of areas where additional evidence may be beneficial, including economic growth, AI and automation, airport-related opportunities, inward investment, skills development, housing, infrastructure, town centre regeneration and climate resilience.

I hope these comments are helpful and can contribute positively to the development of the evidence base and future stages of the Local Plan Review.

Thank you for the opportunity to participate in the consultation process.

Kind regards,

Mal Hussain
Luton Resident
